oval

### Our Tile Products

**Tile Murals Plus' Tile Products** are individually hand crafted using superior specialty inks and coatings. Tiles are printed under pressure and heat at over 400° (F), dry fitted and quality inspected before shipping. The durability of the finish varies based upon style. Please visit our website or contact us for more information on the finish that's right for your application.

## We're Easy To Work With

### Step One:

Determine where your mural will be and the total space it will occupy. Will it be a permanent installation or will it be a framed piece?

### Step Two:

Decide on the size and number of tiles you'll require.

### Step Three:

Determine the style of tile you'd like to use (ceramic, stone, etc.) based upon step one.

### Step Four:

Decide what image you'd like on your mural. Is it artwork? A photo? What format do you have this artwork or photo in? Or... do you have a rough idea and need our assistance? Remember... there are hundreds of public domain images to work with and all can be manipulated with a variety of special effects and/or the addition of copy.

### Step Five:

Armed with the above information, contact us by phone, fax, email, mail or through our website. We'll go over your specifications, ask any clarifying questions, then provide you with an accurate quotation. Now, fully informed, you can place your order with confidence.
